

# How to Make 3D Paper Fish

*Read all of the steps before starting.*

## Step 1: Choose a Pattern and Print It

Choose which fish you want to make. Download and print the pattern.

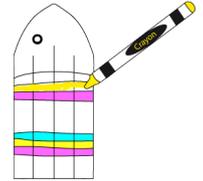

## Step 2: Cut Pattern

Cut out one or all of the fish on the black outlines.

## Step 3: Decorate (optional)

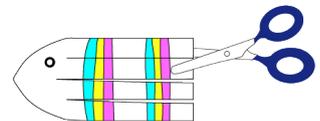

If you like, decorate your paper fish with colored pencils, crayons or markers on the front and back. Color the fish with colored stripes going sideways across the body. Or, try swirls or curlicues going across in various colors. The head can also be colored either a solid color or with more stripes.

**Tip:** You can also cut strips of colored paper to glue on both sides of the fish.

## Step 4: Cut Tail

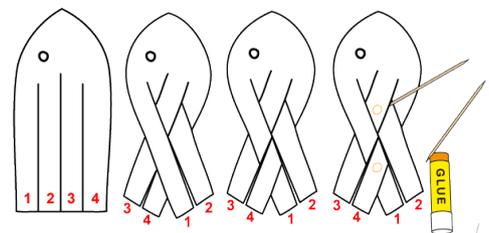

Cut the fish tail into four strips by cutting into the body lengthwise on the three solid lines.

## Step 5: Weave Tail

- Lay the fish with the strips pointing downward.
- Take strip number 3 (from the left) and bring it over strip number 2 and under strip number 1. *The body will poke outward just at the top of the strips.*
- Next, take strip number 4 and bring it under strip number 2 and up over strip number 1.
- Shift the strips slightly as necessary to make them lie neatly beside one another.
- Using a toothpick, put a dab of glue in between strips 2 and 3, and in between strips 1 and 4. Press together and make sure all the strips are still lined up nicely.

Your fish is now complete. Display your fish on a shelf or create a mobile with multiple fish. For a cute package topper, trace the fish pattern onto wrapping paper and complete without coloring.

## Step 6: Hang Fish (optional)

Join the fish together with thread and hang them in a window or from the ceiling. The fish will move with the slightest breeze to the delight of babies and small children, and will make any room cheerier.

Colour the heading card "Jesus is for everyone!" and add it to the top of your hanging fish.

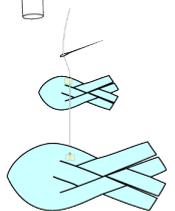

To join the fish, thread a needle with a doubled strand of thread at least three to four feet long. Knot the end of the thread.

Push the needle from back to front near the top and center of the fish. Pull the thread through and secure the knotted thread with a small piece of tape or a dab of glue on the reverse side. Repeat for each fish, leaving 2" or more between each pair of fish and securing the thread with tape or glue on the back.

**That's it! Your fish are done!**

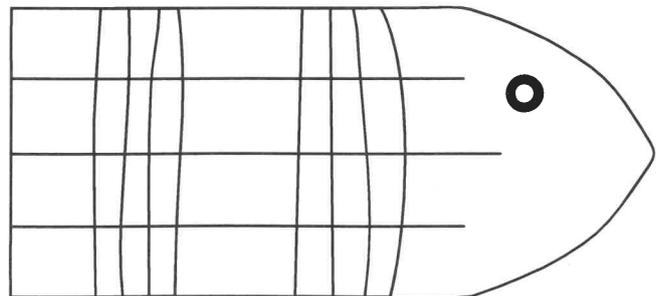

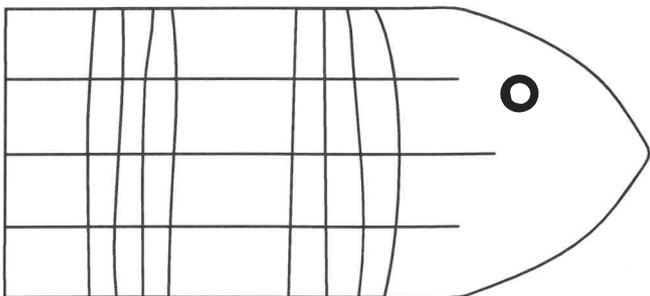

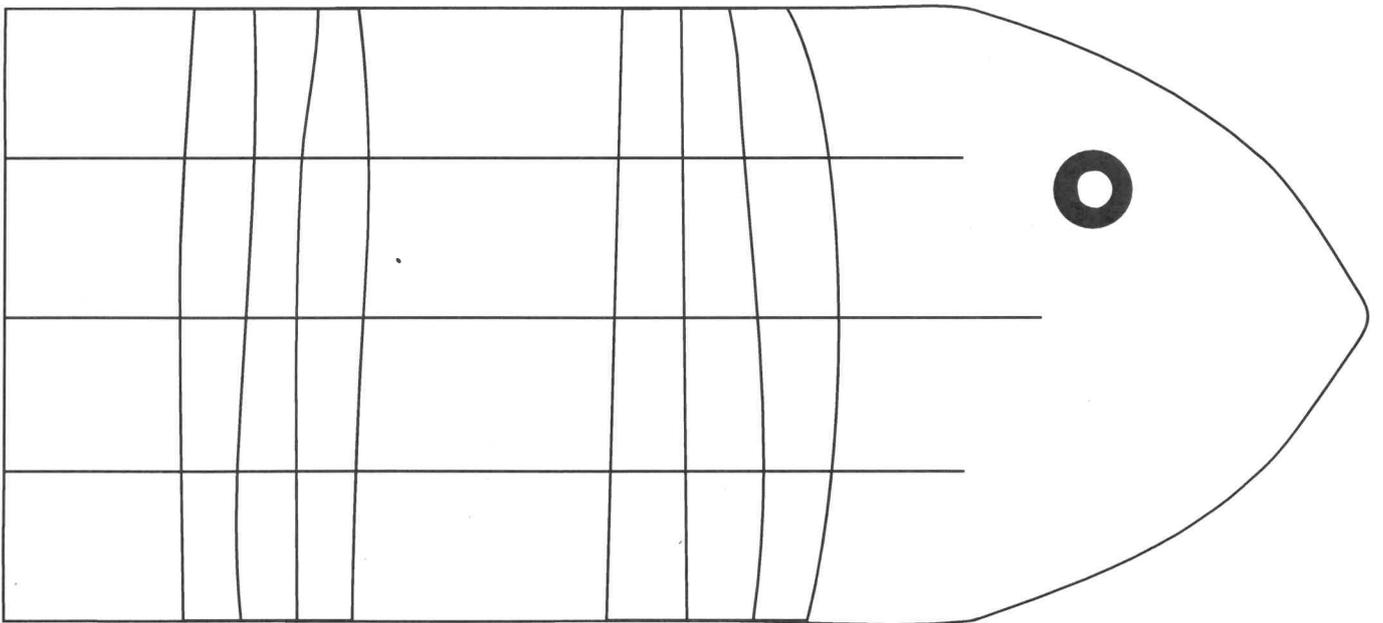

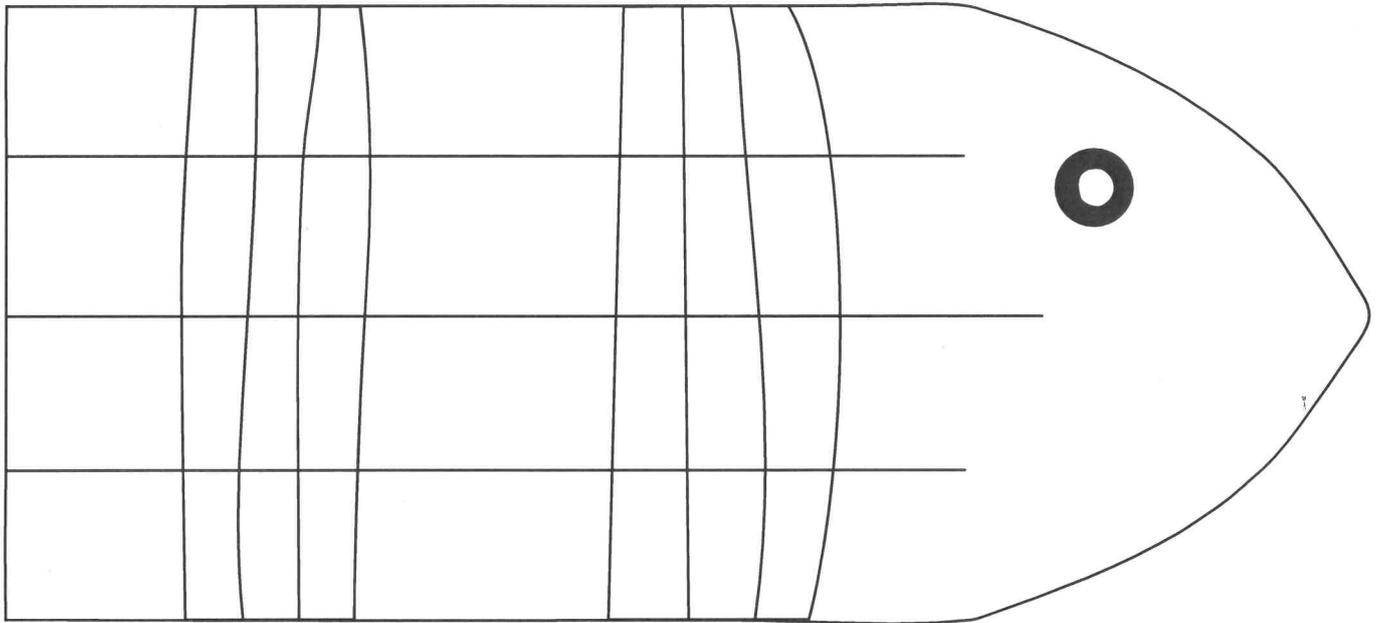

Heading:

Jesus is for everyone!
